

AQUAFLOAT-800 Series

800mm dia. Marker Buoy

**New
Product**

The Sealite Advantage

- High visibility red, green, white or yellow as per IALA recommendations
- Range of mooring equipment & chain available
- Available in three configurations to suit every installation
- Excellent buoyancy & stability
- Mould-in signage to suit customer requirements

The Sealite Aquafloat-800 is a rotationally moulded marker buoy series designed as a single piece low-cost aid to marine navigation. With a large 800mm diameter, these buoys provide clear visibility and can be fitted with a range of marine lanterns.

The Aquafloat-800 series of buoys are available in various configurations to suit IALA requirements, and are rotationally-moulded in high-visibility UV-stabilised polyethylene.

Moulded inserts on the top section of the float allow for convenient lantern attachment, and the entire buoy is available foam-filled to prevent water ingress in the unlikely event of damage.
