

FERRYL[®] Armacit Fluid Packing

ARMACIT is used as packing at high pressure and temperatures.

ARMACIT is a universal cement for an effective and reliable packing, constant to oil, petrol, benzol, paraffin, steam, water, diluted acids, various gases, etc.

The **FERRYL**[®] products rely on chemical properties for best possible results in rust prevention. The special **FERRYL**[®] inhibitors contained in the **FERRYL**[®] grease, oil or plastic compounds provide an excellent long lasting rust protection at a low cost. A few products will cover your entire need. All products are supplied ready to use.
