

FERRYL[®] Fermaid

General Cleaning Agent

FERMAID is a concentrate which is water soluble and alkaline.

FERMAID is used for all general cleaning purposes in the deck, engine and catering departments.

The **FERRYL[®]** products rely on chemical properties for best possible results in rust prevention. The special **FERRYL[®]** inhibitors contained in the **FERRYL[®]** grease, oil or plastic compounds provide an excellent long lasting rust protection at a low cost. A few products will cover your entire need. All products are supplied ready to use.

Range of Applications

FERMAID is ideal for cleaning refrigerated holds, chambers and refrigerators and has a disinfecting and deodorizing effect.

FERMAID is very effective for cleaning in the galley, kitchen, pantries, cleaning of floors, cockers, painted surfaces, washable wallpaper, corridors, toilets, etc.

FERMAID is extremely effective for cleaning of the waterside in boilers and heat exchangers.

Directions for Use

FERMAID should be diluted with fresh water in accordance with the job to be carried out: for light dirt 1 litre of FERMAID diluted with 16 litres of fresh water (1 pint of FERMAID to 2 gallons fresh water).

FERMAID should be stored at above 0 degrees.

FERMAID is delivered in 15 litre plastic drums or 25 litre drums.

For Better Rust Protection and Lubrication Worldwide
