

FERRYL[®] Rustoil

Rust Releasing Oil, Water and Moisture Remover, Penetrating Lubricant

- RUSTOIL** is a penetrating and rustreleasing oil, substantially containing FERRYL RUST INHIBITORS.
- RUSTOIL** has excellent penetrating abilities and will loosen all binding force of rust, hardened oil or grease very effectively.
- RUSTOIL** has a very low surface tension and therefore is active in moisture environment as well.
- RUSTOIL** is also a good lubricating agent.
- RUSTOIL** is not influenced by low temperatures and is always fluid.
- RUSTOIL** contains no harmful components to painted surfaces, leathers or metals.

The FERRYL[®] products rely on chemical properties for best possible results in rust prevention. The special FERRYL[®] inhibitors contained in the FERRYL[®] grease, oil or plastic compounds provide an excellent long lasting rust protection at a low cost. A few products will cover your entire need. All products are supplied ready to use.

Range of Applications	
RUSTOIL	is very effective in loosening hard rusted bolts, nuts, flanges, valves, driving chains, engine- and deck-machinery parts.
RUSTOIL	displaces water and moisture from wires, various surfaces, electric and electronic equipment, etc.
RUSTOIL	has a very low viscosity and will penetrate and lubricate almost any moving object.
RUSTOIL	has been designed for very tough conditions on board ships and has been shown to be a very superior product.

Directions for Use	
RUSTOIL	is to be sprayed, dripped or poured, one or several times on the items that are to be separated. When RUSTOIL has penetrated the rust or dried oil, usually after 10-30 minutes, the separation is easily done. When cleaning or separating machine parts, driving chains, tools, etc., leave the items in a vat with RUSTOIL and wait for a couple of hours, where after the separation is easily done.
RUSTOIL	is delivered in 10 litre steel drums, and in 575 gram spray cans.

For Better Rust Protection and Lubrication Worldwide
