

# Bridge Light

SL-BR Series

*This equipment complies with requirements of the U.S. Coast Guard in 33 CFR part 118*

The SL-BR Series are an LED Bridge Light. They are specifically designed to clearly mark bridges and structures extending over navigable waterways. Used extensively throughout the USA, the SL-BR Series has been designed to offer superior visibility up to 4NM, and operate in conjunction with existing power supplies.

The light is available as a 180° sectored red model or 360° green model and comes fixed-on as standard. The fixtures are also available with a range of factory-set flash characteristics and sectoring requirements to suit local regulations.

The light is available in two configurations, nominal 12VDC or universal AC (110-240VAC).

The SL-BR series can also be supplied as a complete solar/battery system to comply with requirements of regional governing bodies such as the U.S. Coast Guard, or the IALA Recommendations for the marking of fixed bridges over navigable waters.

**Sealite has a range of other short, medium and long range marine lanterns that may also be used to comply with bridge lighting requirements.**
